Profile

I'm a WordPress developer at Theme Wire, and I build sites for my own clients too, in WordPress, Elementor and WooCommerce or in code with HTML, CSS, JavaScript and Next.js. So far that's eight live sites for NGOs, consultancies, health and service businesses and an online store, in Ghana and the UK. I design everything in Figma first, and years of IT support mean I care about what happens after launch: sites that stay fast, secure and easy for clients to update. I also made Pagecast, a Chrome extension and Figma plugin that turns any website into Figma layers.

Product

Pagecast

Version 2.2

Chrome extension and Figma plugin

- Captures a whole web page at desktop, tablet and phone sizes and brings it into Figma as frames, text, images and vectors you can edit.
- Built with JavaScript, Chrome Manifest V3 and the Figma Plugin API. Pages are processed and stored only on the user's own device.

Selected web projects

Agorivia agorivia.co	Operations support for UK therapists, private clinics, care providers and founders	Figma, WordPress, Elementor	Figma design and WordPress build

Experience

WordPress developer

01/2026 to now

Theme Wire, Ghana

- Build websites with WordPress.
- Build custom templates and themes, and write plugins when a site needs something WordPress doesn't do on its own.
- Maintain the websites after they go live.

Freelance web and WordPress developer
Current

Accra and remote

- Built eight live websites in WordPress, Elementor and WooCommerce for NGOs, consultancies, health and service businesses in Ghana and the UK.
- Made Pagecast, a Chrome extension and Figma plugin that turns web pages into Figma layers you can edit.
- Design every site in Figma before building it, and look after sites once they are live.

Technician
02/2022 to now

KA Technologies, Accra

- Assemble and repair laptops, and track down hardware and software faults.
- Support operating systems, applications and networks.
- Run diagnostics and performance tuning; machines run about 20% faster afterwards, with fewer failures.

IT support and technical services (national service)
09/2020 to 11/2021

University of Ghana, Legon

- Handled IT support from network connections and system crashes to printers.
- Set up and tuned hardware, peripherals and software, and advised staff on the technology they used.
- Ran the ICT lab, supporting over 500 students and staff.

Operations manager
07/2021 to 08/2021

Jumeni Technologies, East Legon

- Ran daily operations, logistics and service delivery.
- Led customer onboarding, which kept more clients coming back.
- Designed the company's marketing material and graphics.

Intern, graphic design and web development
06/2019 to 07/2019

MEST Africa (Jumeni Technologies), East Legon

- Learned graphic design and web development with HTML, CSS, JavaScript and WordPress on real projects.
- Helped maintain websites, making them faster and easier to use.

IT support specialist

Christ Cares

- Diagnosed and fixed software and hardware problems.
- Did routine maintenance to prevent downtime.
